

Demographic and Financial Data
Oil City Catholic Community
November 27, 2018

The following pages contain financial and demographic information useful for planning. The figures used in the following calculations are based on figures contained in our parish computer systems (PDS – Parish Data Systems software) and year-end-reports sent to the Diocese of Erie.

For some graphs or datasets, further explanation of the method of calculation used may be necessary. In such cases, an explanation will accompany the graph. For others, summaries of the data presented by the graph may be given.

I am very grateful to the parish office staff, especially Kim Fornof and Judy Fink, for their assistance in compiling this data.

Yours in Christ,

Rev. Ian R. McElrath
Parochial Vicar
St. Joseph & St. Stephen Parishes
